

## Kentucky Alzheimer's and Related Dementias (KARD) Collaborative

The **Kentucky Alzheimer's and Related Dementias (KARD)** Collaborative is a statewide network of professionals, agencies, nonprofits, businesses, persons living with dementia, their care partners, advocates, and members of the Alzheimer's and Other Related Dementias Advisory Council who are passionate and dedicated to making a difference in what Kentucky is doing in the realm of Alzheimer's and Dementia.

The Collaborative has seven workgroups tasked with making strides towards the goals and objectives in the Kentucky Dementia State Plan. These workgroups will include statewide advocates for Alzheimer's and Related Dementias who will work together to make the State Plan come alive and promote and create programs and services that offer comprehensive support to the over 75,000 Kentuckians living with dementia and their 149,000 caregivers!
